MarioDigital Privacy Policy

Last updated: 11 October 2026

This policy applies to MarioDigital and all its apps and programs. MarioDigital is a sole proprietorship, Le Mairekade 77, 1013 CB Amsterdam, the Netherlands (Chamber of Commerce 42161876, VAT NL005546636B41). Contact: support@mariodigital.eu.

MarioDigital does not sell, rent or trade personal data. Our apps and programs contain no ads, no third-party analytics and no tracking. This website does not set cookies.

- **Per app:** what data an app processes, why and for how long differs per app. You can find this in that app's privacy policy, on this website and in the app itself: ByPeek (mariodigital.eu/bypeek/privacy), PinLine (mariodigital.eu/pinline/privacy).
- **Hetzner Online GmbH** provides servers for license management and the online services of our programs. Hetzner works on our behalf; the data remains ours and is stored within the European Union. Hetzner processes connection data for the operation and security of the network.
- **Mijndomein** hosts this website and our email, on our behalf and within the European Union. Mijndomein logs technical data, such as IP address and time, for the operation and security of the website.
- **Microsoft, Google and Apple** sell our apps in their stores and collect the payment. Payment details go to them and never reach us. They receive no data from us.
- **Services you connect yourself,** such as Bybit in ByPeek: the connection runs from your own device to that service, not through us. Those services receive no data from us; their own privacy policy applies.
- **Email:** if you email us, we only use your name, email address and message to answer your question. We do not keep the email longer than needed for that.
- **Legal obligation:** we only share data with others when the law or a court requires us to.
- **Your rights:** you have the right to access, correct, delete, restrict the processing of and port your data, and you can object. Send your request to support@mariodigital.eu. Some of the data we process cannot be traced to a person; the app's privacy policy states which detail is needed to find your data. You can also file a complaint with the Dutch Data Protection Authority (Autoriteit Persoonsgegevens).
- **Children:** whether an app is suitable for children differs per app and is stated with that app. PinLine is suitable for all ages. ByPeek only works with a Bybit account, which requires you to be 18 or older. We never knowingly collect data from children.

If this policy changes, we update the date at the top.
